I'm kinda really biased as it is made by my national and online friend but the original game is surprisingly gripping despite it's simplicity so I suggest giving it a try, and buying this obligatory pop culture reference package if you really enjoy it, to show some support to dev.. Amazing DLC. I'm so excited that I finally treated myself to this DLC! I previously had such a fun experience with the main game minus the DLC, but this adds so much more fun! The Snoutfits are so great, and being able to have early access to new game features is a plus. I tried out the new multiplayer Wolfiball mode with my brother, and we had some good laughs! SnoutUp has done such a great job in bringing fun and unique content to the table, I'm so happy I can show some support in purchasing this DLC.

If you've been playing the main game and have enjoyed it, I highly recommend this DLC to you! Keep up the great work, SnoutUp!. Good way to support a good developer ;). Perfect DLC with new cute pigs! And a great way to support the dev.. This is no joke lit 69V10. say no more with naked pig. Your will play more confidence with new skin :P. this was just supposed to be a game i was just going to download because it was free, and i liked the name. but i ended up playing it and i freaking loved it i have played it for about 77 hours. what makes it even better is that it has an app for IOS. idk abot android.
